Creative Coding II

1/23/22

Homework 1

Madeline Staples

I've been giving the class project a lot of thought. I think the video wall is a very interesting and unique opportunity to create something. For this class project, I really want to create a piece of moving art on p5.Js. Towards the end of last semester, I started discovering you can make hearts and flowers as well as other cool symbols on p5.Js. I would like to make an art piece that has a lot of movement and uses arrays to repeat shapes often. I want to use a fun color scheme and use colors such as light pink, white, and violet.
